DELOITTE

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders

M31 Technology Corporation

Opinion

We have audited the accompanying parent company only financial statements of M31 Technology Corporation (the "Company"), which comprise the parent company only balance sheet as of December 31, 2025 and 2024, and the parent company only statements of comprehensive income, changes in equity and cash flows for the years then ended, and the notes to the parent company only financial statement, including a summary of significant accounting policies.

In our opinion, the accompanying parent company only financial statements present fairly, in all material respects, the parent company only financial position of the Company as of December 31, 2025 and 2024, and the parent company only financial performance and the parent company only cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and auditing standards in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements section of our report. We are independent of the Company in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the parent company only financial statements for the year ended December 31, 2025. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters for the parent company only financial statements for the year ended December 31, 2025 are stated as follows:

Risk of Improper Recognition of Technical Service Revenue

The Company's major revenue source is derived from the technical service income and royalty income received from offering silicon intellectual property (SIP) service.

The recognition of revenue from technical services is based on the terms of each contract. Since the terms of each contract are different, there is a risk that revenue may be recognized before the contractual obligations are fulfilled.

Due to the fact that these transactions involve manual control, there is a risk that revenue will be recognized if the contractual obligations are not fulfilled due to errors. Therefore, we list the recognition of technical service revenue as a key audit matter. Please refer to Note 4, point 11, for relevant accounting policies.

We exercise audit processes as below towards the aforementioned risk of improper recognition of technical service revenue:

1. Understand the design and operating effectiveness of the Company's internal control systems relevant to the recognition of technical service revenue contracts.
2. Sample the technical service revenue contracts recognized in 2025, checking relevant documents and receivable collections, reviewing critical contract provisions, for the purpose of ensuring the proper timing of revenue recognition.
3. Sample the technical service revenue contracts recognized in a period before/after the balance sheet dates to perform the cut-off test, for the purpose of ensuring proper satisfaction of performance obligations and revenue recognition prior to the balance sheet dates.

Responsibilities of Management and Those Charged with Governance for the Parent Company Only Financial Statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with the auditing standards in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors'

report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision, and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements for the year ended December 31, 2025 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audit resulting in this independent auditors' report are Mei-Chen Tsai and Chih Yuan Wen.

Based on this assessment, income and expense items in the statement of profit or loss are classified into operating, investing, financing, income tax, and discontinued operations categories.
- The statement of profit or loss shall present operating profit or loss, profit or loss before financing and income tax, as well as subtotals and totals of profit or loss.
- Provides guidance to strengthen aggregation and disaggregation requirements: The Company shall identify assets, liabilities, equity, income, expenses, and cash flows arising from individual transactions or other events, and classify and aggregate them based on shared characteristics, so that each line item presented in the primary financial statements possesses at least one similar characteristic. Items with dissimilar characteristics shall be disaggregated in the primary financial statements and notes. The Company shall label such items as “Other” only when a more informative label cannot be reasonably identified.
- Enhanced disclosure of management-defined performance measures: When the Company engages in public communications outside the financial statements and conveys management’s perspective on a specific aspect of the Company’s entity’s overall financial performance to users of the financial statements, it shall disclose, in a single note to the financial statements, information related to management-defined performance measures. This includes a description of the measure, the method of calculation, a reconciliation to subtotals or totals specified by IFRS, and the effects of income taxes and non-controlling interests on the reconciling items.

In addition, the following conforming amendments were made to IAS 7 "Statement of Cash Flows":

- When the Company prepares cash flows from operating activities using the indirect method, operating profit or loss shall be used as the starting point of the reconciliation.
- Interest and dividends received by the Company shall be classified as investing activities, while interest and dividends paid shall be classified as financing activities. If the Company determines that it has specific principal operating activities, it shall consider the nature of dividend income, interest income, and interest expense as presented in the statement of profit or loss when determining the classification of dividends received, interest received, and interest paid in the statement of cash flows. However, each of the aforementioned cash flows shall be classified within a single category of activities in the statement of cash flows.

As of the date the parent only financial statements were authorized for issuance, the Company was still assessing the other impacts of the amendments to various standards and interpretations on its financial position and financial performance. The related impacts will be disclosed upon completion of the assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

4.1 Statement of compliance

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

4.2 Basis of preparation

The parent company only financial statements have been prepared on the historical cost basis except for financial instruments that are measured at fair values.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- (1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- (2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- (3) Level 3 inputs are unobservable inputs for an asset or liability.

When preparing the parent company only financial statements, the Company accounts for subsidiaries by using the equity method. In order to agree with the amount of net profit, other comprehensive income, and equity for the year attributable to the owner of the Company in its consolidated financial statements, adjustments arising from the differences in accounting treatment between parent company only basis and consolidated basis were made to investments accounted for using equity method, share of profit (loss) of subsidiaries accounted for using equity method, and share of other comprehensive income of subsidiaries, as appropriate, in the parent company only financial statements.

4.3 Classification of current and non-current assets and liabilities

Current assets include:

- (1) Assets held primarily for the purpose of trading;
- (2) Assets expected to be realized within 12 months after the balance sheet dates; and
- (3) Cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the balance sheet dates.

Current liabilities include:

- (1) Liabilities held primarily for the purpose of trading;
- (2) Liabilities due to be settled within 12 months after the balance sheet dates; and
- (3) Liabilities for which there is no substantive right to defer settlement for at least 12 months after the balance sheet date.

Assets and liabilities that are not classified as current are classified as non-current.

4.4 Foreign currencies

In preparing the Company's financial statements, transactions in currencies other than the Company's functional currency (i.e. foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions.

At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period in which they arise.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising from the retranslation of non-monetary items are included in profit or loss for the period except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income; in which cases, the exchange differences are also recognized directly in other comprehensive income.

Non-monetary items that are measured at historical cost in a foreign currency are not retranslated.

For the purpose of presenting the parent company only financial statements, the assets and liabilities of the Company's foreign operations (including subsidiaries locating in other countries or using currencies different from the currency of the Company) are translated into NT\$ using exchange rates prevailing at the balance sheet dates. Income and expense items are translated at the average exchange rates for the period. The resulting currency translation differences are recognized in other comprehensive income.

4.5 Investments in subsidiaries

The Company uses the equity method to account for its investments in subsidiaries.

A subsidiary is an entity that is controlled by the Company.

Under the equity method, investments in subsidiaries are initially recognized at cost and adjusted thereafter to recognize the Company's share of the profit or loss and other comprehensive income of the subsidiary. The Company also recognizes the changes in the Company's share of equity of subsidiaries.

When the Company's share of loss of a subsidiary equals to or exceeds its interest in that subsidiary (which includes any carrying amount of the investment accounted for using the equity method and long-term interests that, in substance, form part of the Company's net investment in the subsidiary), the Company continues recognizing its share of further loss, if any.

The Company assesses its investment for any impairment by comparing the carrying amount with the estimated recoverable amount as assessed based on the investee's financial statements as a whole. Impairment loss is recognized when the carrying amount exceeds the recoverable amount. If the recoverable amount of the investment subsequently increases, the Company recognizes a reversal of the impairment loss; the adjusted post-reversal carrying amount should not exceed the carrying amount that would have been recognized (net of amortization or depreciation) had no impairment loss been recognized in prior years.

When the Company transacts with its subsidiaries, profit and loss resulting from the transactions with the subsidiaries are recognized in the parent company only financial statements and only to the extent of interests in the subsidiaries that are not owned by the Company.

4.6 Property, plant and equipment

Property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment loss.

Except for freehold land which is not depreciated, the depreciation of property, plant and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation methods are reviewed at the end of each year, with the effects of any changes in the estimates accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss.

4.7 Intangible assets

(1) Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment loss. Amortization is recognized on a straight-line basis. The estimated useful lives, residual values, and amortization methods are reviewed at the end of each year, with the effect of any changes in the estimates accounted for on a prospective basis.

(2) Derecognition of intangible assets

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss.

4.8 Impairment of property, plant and equipment, right-of-use assets and intangible assets

At each balance sheet date, the Company reviews the carrying amounts of its property, plant and equipment, right-of-use assets and intangible assets for any indication of impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. When it is not possible to estimate the recoverable amount of a corporate asset, the asset is tested for impairment in the context of the cash-generating unit (CGU) to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually and whenever there is an indication that the assets may be impaired.

The recoverable amount is the higher of fair value less costs to sell and value in use. If the recoverable amount of an asset or cash-generating unit is estimated to be less than its carrying amount, the carrying amount of the asset or cash-generating unit is reduced to its recoverable amount, with the resulting impairment loss recognized in profit or loss.

When an impairment loss is subsequently reversed, the carrying amount of the corresponding asset, cash-generating unit is increased to the revised estimate of its recoverable amount, but only to the extent of the carrying amount that would have been determined had no impairment loss been recognized for the asset, cash-generating unit in prior years. A reversal of an impairment loss is recognized in profit or loss.

4.9 Non-current assets held for sale

The carrying amount of a non-current asset is classified as held for sale when it is expected to be sold primarily through a sale transaction rather than through continued use. Non-current assets that meet this classification must be available for immediate sale in the current condition and the sale must be highly probable. When the appropriate level of management is committed to a plan to sell the asset and the sale transaction is expected to close within one year from the classification date, the sale will be considered highly probable.

4.10 Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issuance of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss (FVTPL)) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in profit or loss.

(1) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis.

(1.1) Measurement categories

Financial assets are classified into the following categories: Financial assets at FVTPL, financial assets at amortized cost, and investments in equity instruments at fair value through other comprehensive income (FVTOCI).

A. Financial assets at FVTPL

Financial assets are classified as at FVTPL when such a financial asset is mandatorily classified or designated as at FVTPL. Financial assets mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

Financial assets at FVTPL are subsequently measured at fair value, and any remeasurement gains or losses on such financial assets are recognized in other gains or losses. Fair value is determined in the manner described in Note 27.

B. Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- i) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- ii) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost, including cash and cash equivalents, accounts receivable, accounts receivable-related parties, other receivables, other receivables-related parties, and refundable deposits (other listed current assets and non-current assets), are measured at amortized cost, which equals the gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of such a financial asset, except for:

- i) Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of such financial assets; and
- ii) Financial assets that are not credit-impaired on purchase or origination but have subsequently become credit-impaired, for which interest income is calculated by applying the effective interest

rate to the amortized cost of such financial assets in subsequent reporting periods.

A financial asset is credit impaired when one or more of the following events have occurred:

- i) Significant financial difficulty of the issuer or the borrower;
- ii) Breach of contract, such as a default;
- iii) It is becoming probable that the borrower will enter bankruptcy or undergo a financial reorganization; or
- iv) The disappearance of an active market for that financial asset because of financial difficulties.

Cash equivalents include time deposits with original maturities of less than three months, which are highly liquid, readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These cash are held for the purpose of meeting short-term cash commitments.

C. Investments in equity instruments at FVTOCI

On initial recognition, the Company may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation as at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments; instead, it will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

(1.2) Impairment of financial assets

At each balance sheet date, the Company recognizes a loss allowance for expected credit losses on financial assets at amortized cost (including accounts receivable).

The Company always recognizes lifetime expected credit losses (i.e. ECLs) for accounts receivable. For all other financial instruments, the Company recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent

the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

For internal credit risk management purposes, the Company determines that the following situations indicate that a financial asset is in default (without taking into account any collateral held by the Company):

- A. Internal or external information show that the debtor is unlikely to pay its creditors.
- B. When a financial asset is more than 365 days past due unless the Company has reasonable and corroborative information to support a more lagged default criterion.

The impairment loss of all financial assets is recognized in profit or loss by a reduction in their carrying amounts through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognized in other comprehensive income and the carrying amounts of such financial assets are not reduced.

(1.3) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the financial asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. On derecognition of an investment in a debt instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss which had been recognized in other comprehensive income is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the cumulative gain or loss is transferred directly to retained earnings, without recycling through profit or loss.

(2) Equity instruments

Equity instruments issued by the Company are classified as equity in accordance with the substance of the contractual arrangements and the definitions of an equity instrument.

Equity instruments issued by the Company are recognized at the proceeds received, net of direct issue costs.

The repurchase of the Company's own equity instruments is recognized in and deducted directly from equity. The carrying amounts are calculated based on weighted-average amount of the type of shares and the reasons for recovery. No gain or loss is recognized in profit or loss on the purchase, sale, issuance or cancellation of the Company's own equity instruments.

(3) Financial liabilities

(3.1) Subsequent measurement

All financial liabilities are measured at amortized cost using the effective interest method.

(3.2) Derecognition of financial liabilities

The difference between the carrying amount of a financial liability derecognized and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

4.11 Revenue recognition

The Company identifies contracts with customers, allocates the transaction price to the performance obligations and recognizes revenue when performance obligations are satisfied.

(1) Revenue from the rendering of services

The Company identifies performance obligations from contracts with customers and recognizes revenue when performance obligations are satisfied.

(2) Licensing revenue

The functionality of the silicon intellectual property (Silicon IP) are not changed in silicon intellectual property (Silicon IP) licensing transactions. Furthermore, such silicon intellectual property (Silicon IP) remains functional without updates and technical support. While customers use the intellectual property in mass production at the foundries, the royalty prices are determined based on production, sales or other measures and the revenue is recognized with reference to the underlying arrangements.

4.12 Lease

At the inception of a contract, the Company assesses whether the contract is, or contains, a lease.

The Company as lessee

The Company recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the parent company only balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms.

Lease liabilities are initially measured at the present value of the lease payments, which comprise fixed payments and variable lease payments which depend on an index or a rate. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, or a change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Company remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the parent company only balance sheets.

4.13 Employee benefits

(1) Short-term employee benefits

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related services.

(2) Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as expenses when employees have rendered services entitling them to the contributions.

4.14 Share-based payment arrangements

Employee share options granted to employees

Employee restricted shares are recognized as expense on a straight-line basis over the vesting period based on the fair value of the equity instruments at the grant date and the best estimate of the number of shares expected to be vested, with adjustments for other equity (unearned employee benefits). If they are vested immediately on the grant date, full expense is recognized on the grant date.

When the Company issues restricted employee shares, it recognizes other equity (unearned employee benefits) on the grant date and adjusts capital surplus - restricted employee shares at the same time. If the shares are issued for compensation and the employees are required to return the price upon termination of employment, the related payable should be recognized. If an employee leaves the Company during the vesting period and is not required to return the dividends received, an expense is recognized when dividends are declared and adjustments are also made to retained earnings and capital surplus - restricted employee shares.

The Company revises the estimated number of restricted employee shares expected to be vested at each balance sheet date. If the original estimate is revised, the effect is

recognized in profit or loss so that the cumulative expense reflects the revised estimate, with a corresponding adjustment to capital surplus - restricted employee shares.

4.15 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

(1) Current tax

The Company determines current income (loss) in accordance with the regulations of each income tax filing jurisdiction and calculates the income tax payable (recoverable) accordingly.

According to the Income Tax Law, an additional tax of unappropriated earnings is provided for as income tax in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

(2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, research and development expenditures, and personnel training expenditures to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets are recognized for deductible temporary differences associated with such investments only to the extent that it is probable that sufficient taxable income will be available to allow the temporary differences to be realized and to the extent that a reversal is expected in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. A previously unrecognized deferred tax asset is also reviewed at each balance sheet date and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liabilities are settled or the assets are realized, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet dates. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the balance sheet dates, to recover or settle the carrying amount of its assets and liabilities.

(3) Current and deferred taxes

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively.

5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The Company management level will continue to review estimates and underlying assumptions.

Key Sources of Estimation Uncertainty

Estimated impairment of financial assets

The provision for impairment of accounts receivable is based on assumptions about risk of default and expected loss rates. The Company uses judgment in making these assumptions and in selecting the inputs to the impairment calculation, based on the Company's historical experience, existing market conditions as well as forward looking estimates. For details of the key assumptions and inputs used, see Note 10. Where the actual future cash inflows are less than expected, a material impairment loss may arise.

Accounts receivable

As provided by contracts, payments shall be received for services rendered by the Company within 30 to 120 days from the completion of each phase. In determining the recoverability of accounts receivable, the Company considers any change in the credit quality of the accounts receivable since the date the credit was initially granted to the balance sheet dates.

The Company has adopted a policy of only dealing with creditworthy counterparties as a means of mitigating the risk of financial loss from defaults. The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the key management personnel annually.

In order to minimize credit risk, the management of the Company has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Company reviews the recoverable amount of each individual accounts receivable at the balance sheet dates to ensure that adequate allowance for impairment loss is made for possible irrecoverable amounts. In this regard, the management believes the Company's credit risk was significantly reduced.

The Company measures the loss allowance for accounts receivable at an amount equal to lifetime ECLs. The expected credit losses on accounts receivable are estimated using a provision matrix by reference to the past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtor operate and an assessment of both the current as well as the forecasted direction of economic conditions at the balance sheet dates. As the Company's

historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Company's different customer base.

The Company writes off an account receivable when there is information indicating that the debtor is in severe financial difficulty, and there is no realistic prospect of recovery. For accounts receivable that have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognized in profit or loss.

The following table details the loss allowance of accounts receivable based on the Company's provision matrix.

	<u>\$744,643</u>	<u>\$745,102</u>

- (1) Such capital surplus may be used to offset losses, and may also be used to distribute cash or allocate share capital when the company has no losses, provided that the allocation of share capital is limited to a certain ratio of the paid-in share capital each year.
- (2) Such capital surplus refers to the amount transferred from Capital surplus — employee share options during the execution of employee share options.

19.3 Retained earnings and dividend policy

In accordance with the provisions of the Articles of Incorporation, where the Company made profit in a fiscal year, the profit shall be first utilized in the following order:

- (1) Paying taxes.
- (2) Offsetting deficits of previous years.
- (3) Setting aside as legal reserve 10% of the remaining profit until the amount of the accumulated legal reserve equals the amount of the Company's capital.
- (4) Setting aside or reversing a special reserve in accordance with the laws or the regulations of competent authorities.
- (5) The remaining balance shall be added to the accumulated undistributed earnings of the previous period and the board of directors shall prepare a proposal for the distribution of earnings. If the distribution is made by issuing new shares, a resolution shall be submitted to the shareholders' meeting for distribution. In the case of cash distribution, the board of directors is authorized to distribute all or part of the dividends and bonuses in the form of cash payment and report to the shareholders' meeting by a two-thirds of the directors attending the meeting and a resolution of a majority of the directors present.

In accordance with the Articles of Incorporation, the Company's dividend policy takes into account the Company's sustainable operation, stable growth, protection of shareholders' rights and interests, and healthy financial structure, and the Company's

board of directors prepares a proposal for the appropriation of earnings based on future capital requirements and long-term financial planning. Total dividends to shareholders shall not be less than 2% of the appropriated earnings and may be paid in cash or in stock, with cash dividends not less than 10% of the total dividends.

The Company's Articles of Incorporation state the policies on the distribution of employees' compensation and remuneration of directors, refer to "Employees' compensation and remuneration of directors" in Note 21.7.

Legal reserve shall be appropriated until the remaining balance reaches the Company's total paid-in capital. The legal reserve may be used to offset deficits. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

The appropriations of 2024 and 2023 earnings were set out as follows:

	Year Ended December 31, 2024	Year Ended December 31, 2023
Legal reserve	<u>\$ 12,692</u>	<u>\$ 43,597</u>

22.5 Income tax assessments

The tax authorities have examined income tax returns of the Company through 2023. The Company has no pending tax litigation as of December 31, 2025.

23. EARNINGS PER SHARE

	Unit: NT\$ Per Share	
	<u>Year Ended</u> <u>December 31, 2025</u>	<u>Year Ended</u> <u>December 31, 2024</u>
Basic earnings per share		
From continuing operations	\$ <u>1.69</u>	\$ <u>3.05</u>
Diluted earnings per share		
From continuing operations	\$ <u>1.69</u>	\$ <u>3.04</u>

The net profit and weighted average number of ordinary shares outstanding used in the computation of earnings per share are set out as follows:

Net Profit for the Year

	<u>Year Ended</u> <u>December 31, 2025</u>	<u>Year Ended</u> <u>December 31, 2024</u>
Net profit used in the computation of basic and diluted earnings per share	\$ <u>70,591</u>	\$ <u>126,922</u>

Number of Shares (in thousands of shares)

	<u>Year Ended</u> <u>December 31, 2025</u>	<u>Year Ended</u> <u>December 31, 2024</u>
Weighted average number of ordinary shares used in the computation of basic earnings per share	41,772	41,648
Effect of potentially dilutive ordinary shares:		
Employees' compensation	45	4
Restricted employee shares	<u>-</u>	<u>156</u>
Weighted average number of ordinary shares used in the computation of diluted earnings per share	<u>41,817</u>	<u>41,808</u>

If the Company offered to settle the compensation paid to employees in cash or shares, the Company assumed that the entire amount of the compensation will be settled in shares, and the resulting potential shares were included in the weighted average number of shares outstanding used in the computation of diluted earnings per shares, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the shareholders resolve the number of shares to be distributed to employees at their meeting in the following year.

24. SHARE-BASED PAYMENT ARRANGEMENTS

Employee Restricted Shares

Information regarding the issuance of new employee restricted shares is as follows:

<u>Date of Approval of Shareholders' Meeting</u>	<u>Estimated Number of Shares to be Issued (In Thousands)</u>	<u>Number of Shares Resolved by the Board of Directors (In Thousands)</u>	<u>Shares Granted Date</u>	<u>Capital Increase Date</u>	<u>Actual Number of Shares Issued (In Thousands)</u>	<u>Fair Value at the Date of Shares Granted</u>
08/05/2021	400	300	08/27/2021	09/23/2021	288	\$ 333.5
08/05/2021	400	112	05/06/2022	06/28/2022	110	280.5

On August 5, 2021, the shareholders' meeting of the Company resolved to issue new employee restricted shares in the amount of NT\$4,000 thousand, with 400 thousand shares issued, and the issuance method is as follows:

After employees are allotted new employee restricted shares, they will receive the new shares in accordance with the following schedule and in proportion to the shares they have acquired upon the expiration of their term of office and if their performance in that year during the vesting period is up to the expectations.

<u>Vested Period</u>	<u>Proportion of Vested Shares</u>
Two years from the date of grant	50%
Three years from the date of grant	50%

In the event that employees do not meet the vesting conditions or inheritance occurs:

24.1 General termination of employment (voluntary/retirement/layoff/dismissal/retention without pay)

The Company may buy-back the new employee restricted shares (including their stock dividends and related equities) that have not been vested at the issue price.

24.2 Disability, death due to an occupational disaster or general death

- (1) If the employee is unable to continue to work due to a physical disability caused by an occupational disaster, the employee may acquire all of the new employee restricted shares not yet vested upon termination of employment.
- (2) If the employee dies as a result of an occupational disaster or dies in general, the unvested new employee restricted shares are deemed to be fully vested. The successor may apply to receive his or her shares or disposed interests after completing the necessary legal procedures and providing relevant documents.

24.3 Transfer to affiliates

- (1) If the employee requests to transfer to an affiliated company, the Company may buy-back the new employee restricted shares (including their stock dividends and related equities) that have not been vested at the issue price.

- (2) If the Company approves the transfer to an affiliate for operational reasons, the rights and obligations of the unvested new employee restricted shares shall not be affected, but shall still be in accordance with these terms and conditions provided that the performance shall be re-measured after the transfer to the affiliate; and the period of vesting shall continue to work for the affiliate or the Company, otherwise the vesting conditions shall be deemed not to be met and the Company may buy-back the new employee restricted shares (including their stock dividends and related equities) that have not been vested at the issue price.

24.4 Employees who have committed gross negligence such as violating labor contracts or work rules

After the employee has acquired the new employee restricted shares granted by the Company, in the event of a violation of Terms of Agreement, the Trust Deed, the Labor Contract, the Non-Disclosure Agreement, the Corporate Governance Practices Principles, the Ethical Corporate Management Practices Principles, the Code of Ethical Conduct, the Information Security Rules, the Non-competition Agreement and the Work Rules, the Company may buy-back the employee restricted shares (including their stock dividends and related equities) that have not been vested at the issue price.

The Company will proceed with the cancellation of the new employee restricted shares bought back by the Company at the issue price.

The restrictions on the entitlement to shares before the vesting condition is satisfied after the employee has been allotted or subscribed for new shares are as follows:

- (1) The employee may not sell, pledge, transfer, donate, set up, or otherwise dispose of the new employee restricted shares before the vesting condition is met.
- (2) Until the vesting conditions are met, the new employee restricted shares may still participate in the allotment and dividend distribution.
- (3) Upon the issuance of new employee restricted shares, employees shall immediately deliver them to the Trust and shall not request the Trustee to return the new employee restricted shares for any reason or in any manner until the vested conditions have been fulfilled.

Other contractual matters are as follows:

Restrictions on employee rights during delivery of new shares to the Trust, the Company shall act as the exclusive agent of the employees (including but not limited) in negotiating, signing, amending, extending, cancelling and terminating the Trust Deed and the delivery, use and disposal instructions of the Trust Property with the Stock Trust.

The circumstances of the grant of new employee restricted shares described above are summarized as follows:

	<u>2021-1 Employee Restricted Shares</u> <u>(In Thousands)</u>	<u>2021-2 Employee Restricted Shares</u> <u>(In Thousands)</u>

For the years ended December 31, 2025 and 2024, 2 thousand and 16 thousand restricted employee shares were recovered due to employee resignations, respectively. However, for the year ended December 31, 2024, 2 thousand shares remained outstanding, for which the Board of Directors resolved that the capital reduction base date would be March 4, 2025. As the registration of the capital reduction with the Ministry of Economic Affairs has not yet been completed, these shares are temporarily presented under shares pending cancellation.

For the years ended December 31, 2025 and 2024, the compensation costs recognized for restricted employee shares were NT\$549 thousand and NT\$7,563 thousand, respectively.

25. CASH FLOW INFORMATION

- (2) The balances include financial liabilities measured at amortized cost, which comprise accounts payable, other payables (not including payables for salaries or bonuses, payables for annual leave, payables for retirement benefits, payables for insurance, and payables for taxes), and other payables – related parties.

27.4 Financial risk management objectives and policies

The Company's major instruments include equity investments, accounts receivable, accounts payable, and lease liabilities. The Company's corporate financial management function provides services to the business, coordinates access to financial markets, monitors and manages the financial risks relating to the operations of the Company through internal risk reports that analyze exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The corporate financial management function reports quarterly to the board of directors, which functions to monitor risks and policies implemented to mitigate risk exposures.

(1) Market risk

The Company's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (refer to (1.1) below), interest rates (refer to (1.2) below), and other price risks (refer to (1.3) below).

(1.1) Foreign currency risks

The Company has foreign currency denominated service transactions, which expose the Company to foreign currency risk.

The carrying amounts of the Company's non-functional currency denominated monetary assets and monetary liabilities at the balance sheet dates are set out in Note 30.

Sensitivity analysis

The Company is mainly exposed to the exchange rate fluctuation of the United States Dollar (USD).

The following table details the Company's sensitivity to a 1% increase/decrease in the New Taiwan dollar (NTD, the functional currency) against the USD. The sensitivity rate is used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates.

The sensitivity analysis included only outstanding foreign currency denominated monetary items and adjusts their translation at the end of the year for a 1% change in foreign currency rates. A positive number below indicates an increase in pre-tax profit associated with the functional currency weakening 1% against the USD. For a 1% strengthening of the functional

currency against the USD, there would be an equal and opposite impact on pre-tax profit, and the balances below would be negative.

	USD Impact	
	Year Ended December 31, 2025	Year Ended December 31, 2024
Profit or loss	\$ 8,070	\$ 8,341

The aforementioned profit or loss mainly results from the exposure on outstanding USD denominated bank deposits and accounts receivable at the balance sheet dates.

The Company's sensitivity to foreign currency decreased during the current year, mainly due to the decrease in bank deposits denominated in US dollars.

(1.2) Interest rate risk

The carrying amounts of the Company's financial assets and financial liabilities with exposure to interest rates at the balance sheet dates are set out as follows:

	December 31, 2025	December 31, 2024
Fair value interest rate risk		
— Financial assets	\$260,621	\$402,152
— Financial liabilities	2,206	300
Cash flow interest rate risk		
— Financial assets	406,453	356,825

Sensitivity analysis

The sensitivity analysis below was determined based on the Company's exposure to interest rates for both derivative and non-derivative instruments at the balance sheet dates. A 100 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonable possible change in interest rates.

If interest rates had been 100 basis points increase/decrease and all other variables were held constant, the Company's pre-tax profit for the years ended December 31, 2025 and 2024 would increase by NT\$4,065 thousand and NT\$3,568 thousand, respectively, mainly resulting from the Company's variable-rate bank deposits.

The Company's sensitivity to interest rates increased during the current year, mainly due to an increase in floating-rate bank demand deposits.

(1.3) Other price risk

The Company was exposed to equity price risk mainly through its investments in equity securities.

Sensitivity analysis

The sensitivity analysis below was determined based on the exposure to equity price risks at the balance sheet dates.

If equity prices had been 1% higher/lower, the pre-tax profit for the years ended December 31, 2025 and 2024 would have increased/decreased by NT\$428 thousand and NT\$1,358 thousand, respectively, resulting from the changes in fair value of financial assets at FVTPL. The pre-tax other comprehensive income for the years ended December 31, 2025 and 2024 would have increased/decreased by NT\$10 thousand, resulting from the changes in fair value of financial assets at FVTOCI.

(2) Credit risks

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Company. At the balance sheet dates, the Company's maximum exposure to credit risk, which would cause a financial loss to the Company due to the failure of the counterparty to discharge its obligation (not considering collaterals or other credit enhancement instruments, and the irrevocable maximum amount of risk exposure), mainly arises from the carrying amount of the recognized financial assets as stated in the parent company only balance sheets.

The Company has adopted a policy of only dealing with creditworthy counterparties.

To reduce credit risks, the Company's management personnel shall appoint a dedicated team to determine the credit limit, conduct credit examination and

approval, and implement other monitoring procedures to ensure that necessary measures are taken to recover overdue receivables. Moreover, the Company shall review the recovery of each receivable on each balance sheet date to ensure that adequate allowances are made for unrecoverable receivables. Therefore, the Company's management believes that the Company's credit risk has been greatly reduced.

The credit risk management of investments in debt instruments with financial assets measured at amortized cost is as follows.

The Company's policy is to invest only in debt instruments with a credit rating of investment grade or higher and with low credit risk in terms of impairment assessment. Credit rating information is provided by independent rating agencies. The Company continuously tracks external rating information to monitor changes in the credit risk of the debt instruments it invests in, and also reviews other information such as bond yield curves and material information about the debtor to assess whether the credit risk of the debt instrument investment has increased significantly since the original recognition.

The Company measures the expected 12-month credit loss or expected credit loss over the life of the debt instruments by taking into account the historical default rate and default loss rate of various grades provided by external rating agencies, the debtor's current financial condition and the outlook of the industry in which the debtor is engaged. The Company's current credit risk rating mechanism is as follows:

Credit Rating	Definition	Expected Credit Loss Recognition Basis	Expected Credit Loss Rate
Good	The credit risk of the debtor is low, and the debtor has sufficient ability to settle the contractual cash flows	12-month expected credit loss	-

The Company's concentration of credit risk was mainly attributable to the Company's three largest customers, which accounted for 15% and 13% of total accounts receivable as of December 31, 2025 and 2024, respectively.

(3) Liquidity risk

The Company manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Company's operations and mitigate the effects of fluctuations in cash flows.

(3.1) Liquidity and interest rate risk tables for non-derivative financial liabilities

The maturity analysis for non-derivative financial liabilities is prepared based on the undiscounted cash flows (including both principal cash and interest) of financial liabilities based on the earliest date on which the Company can be required to pay. Specifically, bank loans with a repayment on demand clause were included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities were based on the agreed upon repayment dates.
